LANGUAGES

Tagalog

English

Full Web Stack Developer with more than 5 years of experience. Proficient in a wide array of programming languages, I excel in both backend and frontend development. A collaborative team player, I navigate the development process seamlessly, bringing technical expertise and effective communication to the table. Continuous improvement is my mantra, ensuring I stay ahead in the ever-evolving tech landscape. Let's connect and explore how my skills can contribute to your projects!

WORK EXPERIENCE

Full Stack Web Developer
Vavasoftware Corporation, BGC
Full-Time: September 2024 – April 2025

- Developed scalable web applications and SPAs using CSS, SCSS, PHP, Laravel, TALL Stack, Vue, React, Git, and MySQL. Conducted code reviews, identified bugs, and applied fixes to maintain code quality and efficiency. Collaborated with product managers to prioritize and deliver new features on schedule.
- Developed, optimized, and maintained secure RESTful APIs for efficient data exchange. Integrated third-party APIs, including cryptocurrency payment gateways and game provider APIs, to enhance functionality and user experience.
- Developed features and functionalities for a game system, ensuring stability and performance.
- Managed version control using Git and Bitbucket to ensure smooth collaboration and code integrity.
- Developed and maintained CI/CD pipelines using Jenkins and Docker, automating testing, deployment, and delivery workflows to enhance reliability and deployment speed.
- Integrated and managed AWS services, including EC2, RDS, S3, Lambda and IAM, to optimize cloud infrastructure, enhance scalability, and streamline file management.

Front End Developer
Boss Deal
Freelance: August 2024 – March 2025

- Developed and maintained scalable web applications and SPAs using CSS, SCSS, Vue and MySQL, delivering seamless user experiences. Collaborated with product management to prioritize and deliver features on schedule, while conducting code reviews, resolving bugs, and optimizing performance for high-quality, maintainable code.

- Developed, optimized, and maintained secure and scalable RESTful APIs for efficient communication between the front-end and back-end of the game.
- Managed version control using Git and Bitbucket to ensure smooth collaboration and code integrity
- Developed and maintained CI/CD pipelines using Jenkins and Docker, automating testing, deployment, and delivery workflows to enhance reliability and deployment speed.

Full Stack Web Developer
FEIWIN, Cavite
Full-Time: October 2023 – September 2024

- Developed and maintained scalable web applications and SPAs using CSS, SCSS, PHP, Laravel, TALL Stack, Vue, React, and MySQL, ensuring seamless user experiences. Collaborated with product management to deliver features on time, conducted code reviews, resolved bugs, and optimized performance for high-quality, maintainable code.
- Developed, implemented, optimized, and maintained secure, scalable RESTful APIs to ensure efficient and seamless communication between front-end and back-end systems. Integrated third-party APIs, including Game Provider APIs, to ensure efficient data exchange, boosting performance and user experience.
- Managed version control using Git and Bitbucket to ensure smooth collaboration and code integrity.
- Developed and maintained CI/CD pipelines using Jenkins and Docker, automating testing, deployment, and delivery workflows to enhance reliability and deployment speed.
- Integrated and managed AWS services, including EC2, RDS, S3, Lambda and IAM, to optimize cloud infrastructure, enhance scalability, and streamline file management.

Full Stack Web Developer & 2d Game Developer
Infinite Evolution Technology Incorporation, Pasay
Full-Time: October 2022 – September 2023

- Developed and maintained scalable web applications, SPAs, and mobile game applications using CSS, SCSS, PHP, ThinkPHP, Cocos2dx, Lua, and MySQL. Collaborated with product management to prioritize and deliver features on time, while conducting code reviews, resolving bugs, and optimizing performance for high-quality, maintainable code.
- Developed and maintained CI/CD pipelines using Jenkins and Docker, automating testing, deployment, and delivery workflows to enhance reliability and deployment speed.

- Developed and improved RESTful APIs to ensure efficient communication between the front-end and back-end of the game, optimizing performance and scalability for a smoother user experience.
- Managed version control using Git and Bitbucket to ensure smooth collaboration and code integrity.

Full Stack Web Developer
RAGOA Business Solutions
Freelance: January 2021 – September 2023

- Developed and maintained SPAs and web-based systems (e.g., Booking, Content, Delivery, Voting Management Systems, E-commerce platforms, and School Management Systems) ensuring scalability, efficiency, and seamless user experiences. Collaborated with product management to prioritize and deliver features on time, conducted code reviews, resolved bugs, and optimized performance for high-quality, maintainable code.
- Developed, implemented, optimized, and maintained secure, scalable RESTful APIs to ensure efficient and seamless communication between front-end and back-end systems.
- Managed version control using Git and Bitbucket to ensure smooth collaboration and code integrity.
- Developed and maintained CI/CD pipelines using Jenkins and Docker, automating testing, deployment, and delivery to improve reliability and speed. Integrated and managed AWS services (EC2, RDS, S3, Lambda, IAM) to optimize cloud infrastructure, scalability, and file management.

Full Stack Web Developer
CaPEx: Cargo Padala Express
Full-Time: AUGUST 2019 – September 2022

- Developed and maintained SPAs and web-based systems (e.g., Warehouse Management, Accounting, HR Information Management, Booking Systems, and E-commerce platforms) ensuring scalability, efficiency, and seamless user experiences. Collaborated with product management to prioritize and deliver features on time, while conducting code reviews, resolving bugs, and optimizing performance for high-quality, maintainable code.
- Developed, implemented, optimized, and maintained secure, scalable RESTful APIs to ensure efficient and seamless communication between front-end and back-end systems.
- Managed version control using Git and Bitbucket to ensure smooth collaboration and code integrity.

- CI/CD pipelines using Jenkins and Docker, automating testing, deployment, and delivery to improve reliability and speed. Integrated and managed AWS services (EC2, RDS, S3, Lambda, IAM) to optimize cloud infrastructure, scalability, and file management.

EDUCATION

Bachelor of Science in Information Technology (2015 – 2019)

STI Paranaque – Paranaque City, Metro Manila

SKILL

Front End

Vue.js, React.js, JavaScript, Jquery, Alpine.js, Tailwind CSS, CSS, SCSS, Bootstrap, Flutter, jQuery, Cocos2dx, and Livewire

Back End

MySQL, SQLite, Redis, PHP, Laravel, Livewire, Lua, ThinkPHP, and Python, Git, Bitbucket, Linux, and Laravel Forge, Digital Ocean, AWS

Tools

ChatGPT, Visual Studio Code (VS Code), Postman, Herd, Laragon, Redis, MySQL Workbench, Git, GitHub, GitLab, AWS, Docker, Composer, Node.js, NPM, Vite, Nord VPN.
